

Conditional Implicit Definitions Quiz

1. Implicit definitions can take implicit parameters? *true*
2. At most two implicit definitions can be chained together. *false*
3. Consider the following program:

```
trait Physics {  
  implicit def air: Gaz  
  implicit def condense(implicit gaz: Gaz): Liquid  
  implicit def freeze(implicit liquid: Liquid): Solid  
  
  implicitly[Solid]  
}
```

Can you rewrite the last line with the inferred arguments explicitly written?

implicitly[Solid](freeze(condense(air)))
